

Dear Madam or Sir,  
I'm writing to urge to you to reject NAB Petition 04-160. In my view, NAB member have failed in their duty to use public airwaves that is consistent with the public interest. Accordingly, I have turned to satellite radio.

It is my hope that the availability of satellite radio's innovative programming formats, to include real-time local news and weather, will exert pressure on NAB members to reform their business practices.

Please allow the unfettered marketplace of broadcasting ideas to do its work.

Regards,  
Daniel Luechtefeld
